

1. What is the topic of this research?
2. What are the hypotheses being tested in this study (if multiple, you can pick one).
3. What is the sample used in the study?
4. What test is used to test the hypothesis you picked?
5. What are the conditions for this test? Do you think the sample meets the conditions?
6. What is the p-value of the test?
7. What decision is made with respect to H_0 and H_1 ?
8. Given that decision, what conclusions were made based on the research?
